Bithereum (BTH) - Internal Smart Contract Security Review

Date: July 10, 2025

Smart Contract Address:

0x6fe9536Ca9d20c6D339f9C066D06C56c678a8606

Compiler Version: Solidity v0.8.24

Overview:

- The contract is based on standard ERC-20 logic.

- Uses OpenZeppelin libraries for security and reliability.

- Token is non-mintable after deployment (fixed supply).

- Includes basic transfer tax functionality (2%).

- Includes burnable mechanism.

- No owner functions to withdraw user funds.

- Ownership is properly transferred and verified.

Risks:

- No external audit from third-party provider yet.

- Future community governance should be considered.

Conclusion:

[PASSED] Internal manual review completed.

[SECURE] No critical vulnerabilities found.
